

Fiberlok logo wear from DENNIS

- ⇒ Superior graphic quality
- ⇒ Long-lasting performance
- ⇒ Soft & vibrantly colored

More than just an iron-on logo.

Fiberlok transfers are soft to the touch, nearly indestructible, vibrantly colored and feature stunning image quality unmatched by conventional heat transfer, embroidery and “flock” logo applications.

Works on everything.

Durable & flexible, Fiberlok logos work well on any fabric compatible with heat application. From gym wear to outerwear, athletic mascots to school crests, Fiberlok wins the day!

Built to last.

Industrial application at 300+ degrees and Fiberlok's patented adhesive ensures your logos will last — often outliving the garments they are applied to.

In good company.

Fiberlok logos can be found on NHL and MLB sports jerseys, NCAA and NBA licensed merchandise, and are the preferred logo application for the European Soccer Leagues. Fiberlok also works with companies like Nike and Adidas.
